### 6. A Work Session On The Following Items:

*F. Discussion Regarding The City Noise Ordinance*

# Colonial Heights – Noise (§ 218-4 / § 273-15)

- § 273-15 primarily addresses noise from and/or caused by a motor vehicle
- § 218-4 addresses sound regarding
  - Residential areas between the hours of 10pm and 7am related to:
    - Refuse, waste, and recycling collection vehicles
    - Lawncare, maintenance and landscaping equipment and activities
  - General prohibition sound producing and/or reproducing devices
  - Within the confines of a dwelling unit between the hours of 12:01am to 7am
  - Includes a measurement distance of 50 feet
  - Misdemeanor with min and max range of fines

## Chesterfield Co. - Noise

- Predominantly the Same language as Colonial Heights, except
  - Includes provisions addressing noise on agricultural land
  - Has an additional timeframe for noise in residential areas
  - Standard of detection has different terminology
    - “plainly audible” vs. “heard”
  - No increase in fine amount for subsequent offense

## Hanover Co. - Noise

- More extensively defined ordinance
- Prohibits noise generally then lists specific times of prohibition, and in some cases distances of measurement, for certain types of noise
- Has a detailed section on domestic animals that disturb the peace during the day
- Identifies civil and criminal penalties
- Includes maximum permissible sound pressure levels
  - Measured by an average decibel level
  - Requires instruments for measurement
  - Different levels based on time of day and zoning of property

## Henrico Co. - Noise

- Recently adopted (Dec. 2022)
- Contains similar language for noise
- Lists prohibited noises but includes several conditions for evaluation that differ between others
- Lists several exceptions for each prohibited noise listed
- Differentiates times of enforcement for different types of activities
  - Includes many daytime enforcement hours
- Has a detailed section on domestic animals that disturb the peace

# Summary

- Most of the ordinances classify noise in 2 distinct ways
  - Noise in “residential areas” (This noise heard outside on one’s property)
    - Refuse/recycling collection and lawncare activities
  - Noise heard from within the dwelling of another property
    - Sound from noise producing or reproducing devices
- The standard for noise detection in other localities uses the terminology of “plainly audible”
  - Defined as “**any sound for which the information content of that sound is unambiguously communicated to the listener**, including but not limited to, understandable spoken speech, comprehensible musical rhythms or vocal sounds”.
  - Colonial Heights uses the terminology “heard”

# Summary

- All also include a specified distance of 50 ft. for the noise detection standard
  - Henrico also uses 100 ft. for social gatherings
- Exceptions listed by other localities appears to be in place to not unfairly penalize commercial businesses
  - However, the other localities ordinances do not appear to address the issue of having commercial and residential uses abutting one another
- Henrico and Hanover specifically reference daytime hours for prohibition of certain noises
