I-95/Temple Avenue Improvements Project Colonial Heights, VA

December 8, 2015 – Colonial Heights City Council briefing

Harold Dyson, P.E.

Construction Manager, Richmond District

Tom Heil, P.E.

Allan Myers

Darell Fischer, P.E., DBIA

Rinker Design Associates

About the Project

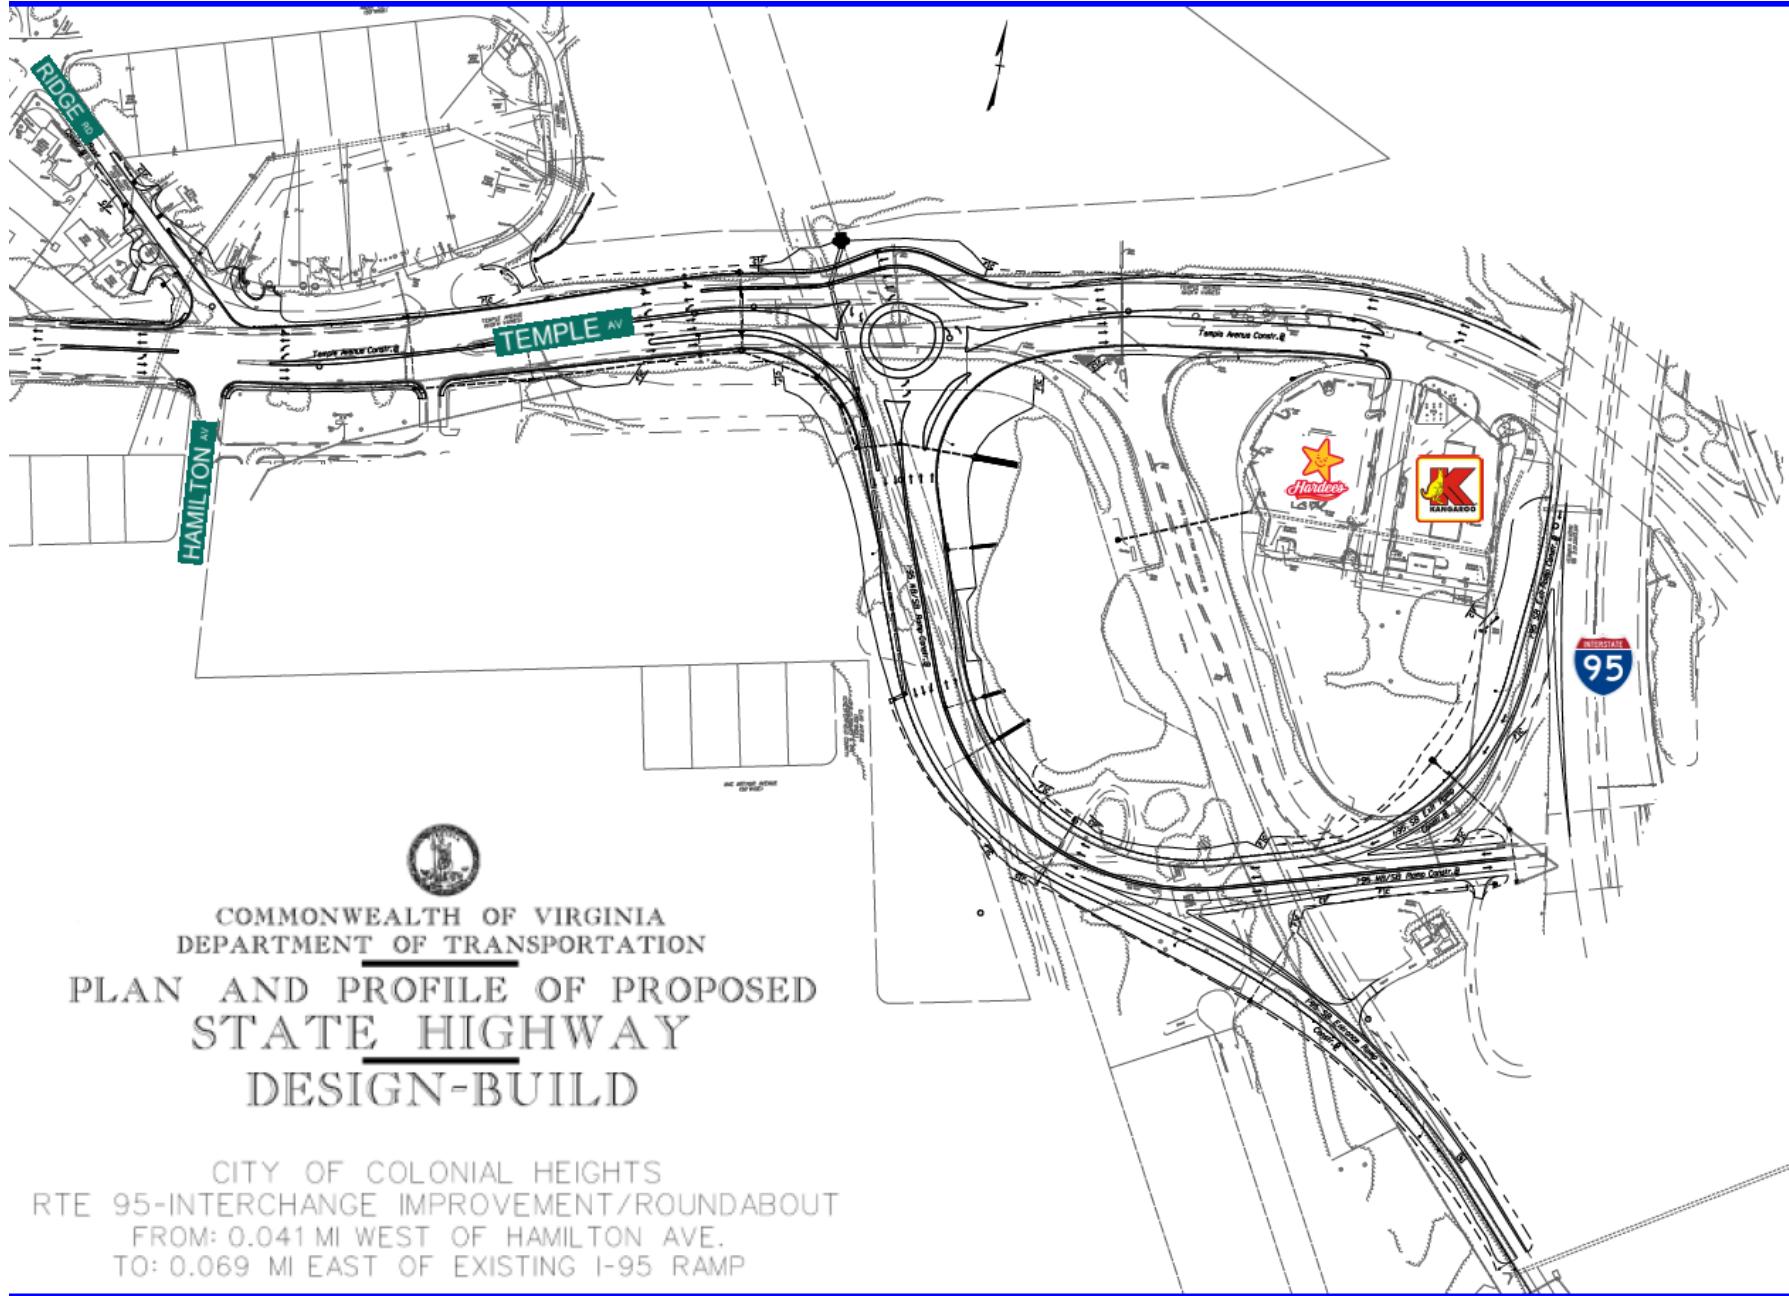

- Realigns the entrance and exit ramps at the I-95 interchange at Temple Avenue and replaces the existing signalized intersection with a roundabout
- Roundabout will be relocated west of the current intersection; includes two lanes for traffic and a continuous bypass lane on the westbound approach
- Requires removing the Temple Avenue bridges over the railroad to construct the roundabout
- I-95 ramps will be extended and improved to provide better sight distance, vehicle capacity and transition from interstate speeds to the roundabout
- \$13.4 million design-build project to be completed by November 2017

Why a roundabout?

- The roundabout design was chosen as the most efficient design for this congested intersection to provide improved safety and traffic flow.
 - 30,000 vehicles/day at the Temple/I-95 intersection
 - 41 total crashes* at this interchange – more than half are angle crashes which increase risk of injuries and major damage
- A roundabout reduces wait times by allowing traffic to continually move at a low rate of speed versus coming to a complete stop at signals; especially critical during peak traffic hours.

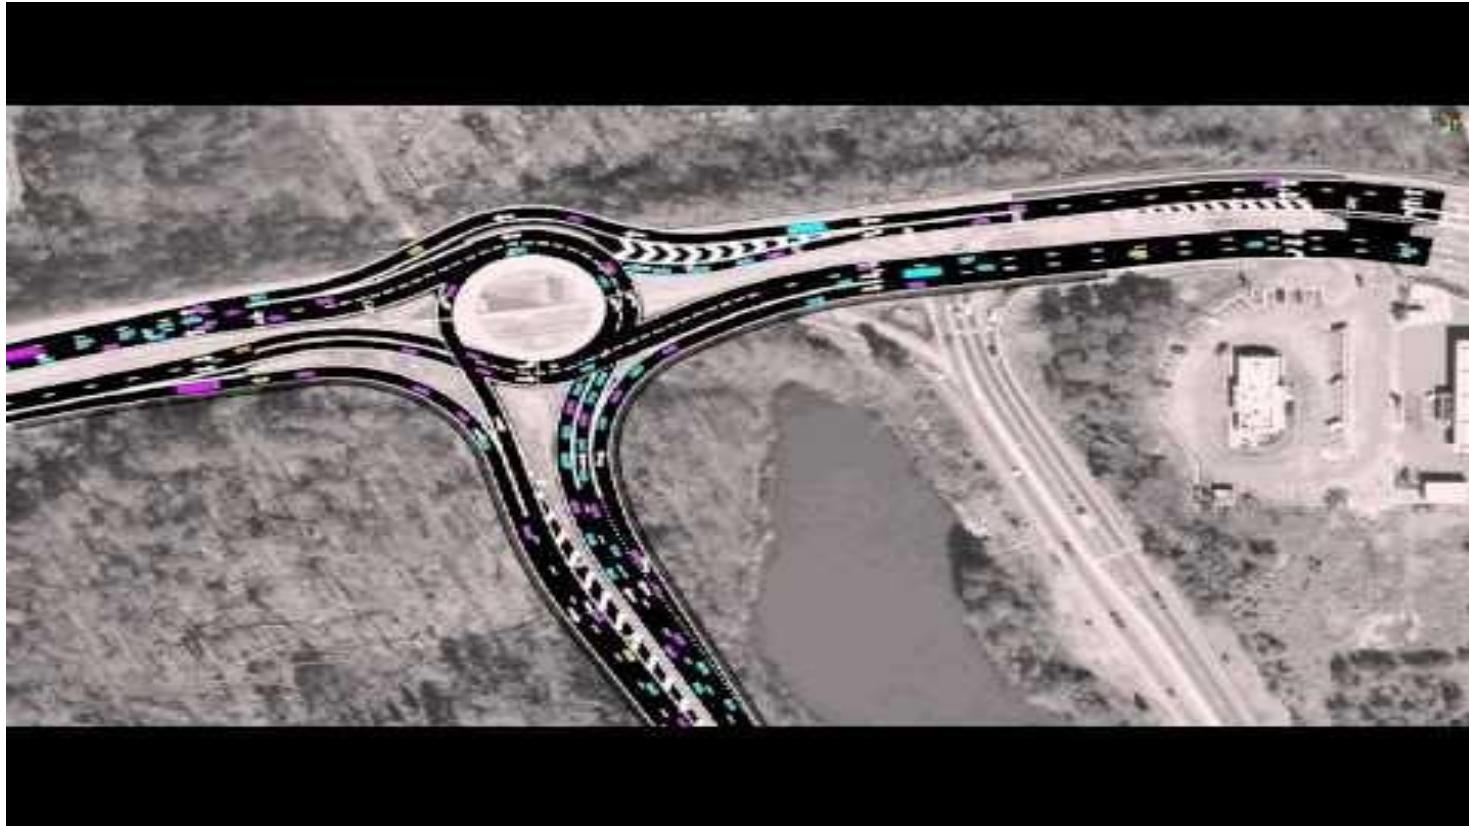

* crash history over latest three-year reporting ending May 31, 2015
